

Dear Parents,

Some of you have expressed an interest in adding days or extending your child's day for the New Year.

This is the time of year when the children have adjusted to their new routine and having fun in school. The 2 day program was designed for the children who may cling, cry, throw a tantrum and are challenged with separation anxiety. Many of the children have made their turning point.

At this time, we do suggest adding days if you are able too. They will adjust quicker and become more confident. It will give us more time to work with them socially and academically. You will notice the difference and should see growth.

We strongly recommend all children who are going to be attending kindergarten next fall to consider adding on the longer day. Extending the day will prepare your child physically and emotionally for the longer day at school. This will allow us the advantage of conditioning them for a longer day and to promote their social and academic developments, and further preparing them for kindergarten. The children will gain necessary skills at opening their lunch boxes, and their juice boxes. By doing this, the children acquire self-care skills essential for kindergarten. We offer guidance and support to the children until they become self-confident and independent in accomplishing these tasks. For the children who added on the PM program (12:00-2:00), please remember, to supply your children with their lunch in a lunch box, so that they can develop the necessary skills expected when attending Kindergarten this fall.

Please notify Sharon and fill out form below if you are interested in adding more days or extending your child's day.

Thank you,

Sharon
